

Invitation letter

Dear friends and colleagues,

I am writing to you in connection with our joint meeting in Brussels in autumn 2012, where we discussed the idea of establishing a pan-European "STOP HF EU Coalition" and representatives of 7 countries expressed their immediate willingness to join it.

I am therefore inviting you to the pan-European meeting in the heart of Europe, the Czech Republic, in an area where the Hutton Energy mining company has shown keen interest. This is an area where every other citizen has signed the petition against "fracking", an area near Prague where one of the most beautiful castles in the world, Karlštejn, is located.

The objectives of our joint meeting are:

- to establish the STOP HF EU Coalition (statutes, way of leading resistance, unified website)
- to evaluate the development of the situation in Europe and the experience in countries of overseas guests, if present
- to discuss the issue of establishing a STOP HF – World Coalition
- to appeal to the European Commission and European Parliament
- to prepare a series of laws for individual countries based on the model of Bulgaria, France and the Czech Republic

To date, we have succeeded in establishing contacts with a number of anti-fracking groups around the world. Everyone, without exception, agrees with the creation of a worldwide coalition. So it is time to intensify and especially to unify opposition.

I urge you, dear friends, to take part in this historic meeting.

Best regards,

Jiří Malík  
Head of the National Campaign  
STOP HF Coalition
